Vitoria,

Here is an On-the-record response:

*"Brazil is a priority country for Meta, which is why we have experts on the ground and have made significant investments in people and technology to enforce our policies in dozens of languages, including Brazilian Portuguese. We spent over \$5 billion globally on safety and security in 2021 alone and have 40,000 people working on these issues. Since 2017, we have also taken down over 150 networks seeking to manipulate public debate, and they have originated in over 50 countries, including in Brazil. Our track record shows that we crack down on content that violates our rules in Brazil." - Meta spokesperson*

Please find attached also a one pager which describes some of the efforts we are taking to protect the integrity of the elections in Brazil.

Best,

Iain
