

# Response to Business & Human Rights Resource Center AI Qst Report

**Air Products Response**  
**14 February 2023**

Air Products has operations in more than 50 countries around the world, and no matter where we operate, we uphold our commitment to ethical business and to human rights in our operations, businesses, communities and supply chains. One element of our higher purpose as a company is to promote innovation and collaboration. We believe our presence in Saudi Arabia gives us an ability to make a positive contribution and a meaningful difference to the country and to the world by supplying carbon-free hydrogen via the NEOM green hydrogen project, which does not depend on the megacity of NEOM.
