Despite the continuous addition of regulatory initiatives concerning corporate human rights responsibilities, what we witness more often than not is a situation of corporate impunity for human rights abuses. The Bhopal gas leak – examined as a site of human rights violations rather than as a mass tort or an environmental tragedy – illustrates that the regulatory challenges that the victims experienced in 1984 have not yet been overcome. This book grapples with and offers solutions to three major regulatory challenges to obligating companies to comply with human rights norms whilst doing business: why companies should adhere to human rights, what these responsibilities are, and how to ensure that companies comply with their responsibilities.

Building on literature in the fields of law, human rights, business ethics, management, regulation and philosophy, this book proposes a new ‘integrated theory of regulation’ to overcome inadequacies of the existing regulatory framework in order to humanize business.
