TO WHOM IT MAY CONCERN:

Porgera Police Station
P.O. Box 120
PAIAM
Porgera, Enga Province

SUBJECT: HINDERANCE IN TO POLICE INVESTIGATIONS.

This is in reference to a case of police shooting that had occurred at PTV mine site on Tuesday 27th July, 2008 between the hours of 10-11pm.

The NS14 members were on hire that time and performing their tasked duties within the company premises and had shot one namely Victim name redacted to death.

I as being the investigator was trying to carry out the investigation when an expatriate company investigator namely John Murphy denied assisting me with the photos and any other foreign elements picked up from the scene.

To make it worse on my side of investigation, he also denied providing me the company's time sheet or duty roster of the NS14 members concerned at that night.

Therefore, the case has been sitting pending till now. With that attached are the copies of Medical Report, crime Report and major Incident form.

Louis in trust,

TO WHOM IT MAY CONCERN

Dear Sir/Madam,

Re: - **POLICE REPORT ON DEATHS AT MINE SITE PORGERA – ENGA**

Attached herewith are some of the autopsy reports from the hospital here at Paiam. There are so many deaths at the mine site but we the local police CIDs here at Porgera are not called to the crime scenes at the mine site, especially at the open pit. Deaths occurred at the open pit were only brought to the hospital and we local police CIDs only witnessed the post-mortems at the hospital.

There are so many deaths at the mine site but most of them are not reported to police. The relatives just take the bodies away home to bury them only. Only few of them are reported to police to witness the post-mortems at hospitals.

Some times we are called to the crime scene at the open pit but not deeply to the exact locations of the crime scenes. The words to us by the management is, it is a no go zone and we are not taken to the exact locations of the crime scenes. We the local police have sworned to the God to go to the risky areas like the open pit, but could not understand the company's regulations at the mine site for us the police to visit the crime scenes at the open pit.

They have their own investigators who attended the scenes and come to us with statements from eye witnesses from the mine site but it is not fair for them to carryout the investigations there within themselves. It has to be referred to us the local CIDs here but that does not happen up till then.

This genuine report of what actually happen at the giant Gold Mining of Porgera Valley in the Enga province and it is submitted to the Akali Tange association of Porgera Golden Valley upon request from the association.

If any doubt arises do not hesitate to contact writer on phone :

Yours faithfully,

Time & Date of Death: 8:30pm, July 23, 2008
Place of Death: Top of open pit, level 36 at mine site
Cause of Death: Intra-cranial hemorrhage secondary to gunshot wound to the head.

Summary of Autopsy report:

The post mortem found a gunshot wound at the right eyebrow but with no exit wound. The entrance wound was about 1cm in diameter. There were two metal fragments(slug) as seen on x-ray. The bigger fragment was about 8mm at its widest diameter was recovered at the right occipital lobe of the brain. The smaller fragment which was located at the right frontal lobe of the brain as seen on x-ray was not recovered. There was devitalized brain tissue at the right frontal, parietal and occipital lobes of the brain. There was moderate intra-cranial hemorrhage and sub-dual hemorrhage of the right side of the brain.
