The announcement

Aug. 23, 2005

Henna Rebecca Hair Products Inc. is a manufacturer specialised in producing hair products. It always abides by the national law, rules and also the international law. Its operation is always within the national and international laws. The report about using the inmates to make hair products in the article BANKS BUY INTO JAIL-LABOUR FIRM written by Mr. Jamil Anderlini on the South China Morning Post is not true. We declare that there isn't that kind of matter happened in the past and at present time.

Firstly, to produce the hair products needs lots of equipments and the working conditions. Henan Rebecca Hair Products Inc. has the all-round and indivisible production system and installations. How can it install the production system in the prison? It cannot!

Secondly, to produce the hair products needs skilled workers. The skilled workers in Henna Rebecca Hair Products Inc. must be trained for 6-12 months. After the training, the workers can have the ability to operate. So it is impossible that Henan Rebecca Hair Products Inc. trained the inmates.

Thirdly, to produce the hair products needs lots of sharpen tools such as scissors which are the complete prohibition in the prison in china. So it is impossible to make the hair products by the inmates.

Lastly, we, the personnel of Henna Rebecca Hair Products Inc. always respect the human right. We cannot use the inmates to make anything for us.

To sum up, the report about using inmates to make hair products on South China Morning Post is not tally with the facts.

Henna Rebecca Hair Products Inc.
